Pangiam Government Solutions

Linkware is now Pangiam Government Solutions

For 15 years, Linkware has been dedicated to developing, delivering and managing the IT systems used to support U.S. Customs and Border Protection's (CBP) traveler identity verification efforts, requirements borne from the 9/11 Commission Report.

Now, as a Pangiam company, Linkware will be known as Pangiam Government Solutions, and we will continue to offer our proven expertise along with a greater variety of products and solutions to national defense agencies and the broader federal market — all those interested in coupling identity verification capabilities with security and screening, law enforcement efforts, or citizen services.

Regardless of the initiative, agencies can benefit from our unmatched knowledge and leadership in facial recognition and biometrics, DevSecOps delivery for essential government systems, and use of big data to solve mission-critical challenges. Additionally, we support an entirely different cost model, enabling agencies to transition from capital expenses (CapEx) to operating expenses (OpEx). That means you can deploy solutions and services in days or weeks, rather than the years it typically takes to invest in, build and staff such programs. And our solutions are easy to scale cost-effectively, making them sustainable for the long term.

Key Systems and Capabilities

- **Biometric Matching and Verification**
  o Senior expertise in traveler manifest systems and data sources from airlines, U.S. Customs and Border Protection, Department of State, and U.S. Citizenship and Immigration Services
  o Global Entry, Preclearance, Simplified Arrival
  o Investigative case management systems
  o CBP Cloud and CBP Intelligence Enterprise
- **Digital Modernization Technologies and Methodologies**
  o DevSecOps, micro services, and UI/UX
- **Managing and Transforming Data at Scale**
  o Search, Facial Recognition, Vetting
  o Advanced Analytics, Visualization
  o Artificial Intelligence, Machine Learning
  o Predictive Modeling, Advanced Analytics
- **Enterprise Architecture, Systems Development and Integration**
  o Native Cloud and Cloud Migration Services
  o Cloud App Development
  o Software and Mobile Solutions

Streamline the Safe and Authorized Passage of People

Access control isn't limited to cybersecurity. With Pangiam Government Solutions, you can streamline and secure access to buildings, facilities, venues, airports, airlines — anywhere you need to monitor and authorize the passage of people.

Pangiam Government Solutions products are modular and can be purchased individually or as comprehensive solutions to **improve and secure access control** in a wide variety of settings:

- **Pangiam Beacon** – Our simple application provides visitors or guests with a convenient way to enroll in biometric matching and identity verification services – from their home, on the road or at the onsite venue. This app can be standalone or integrated into your existing web presence, and works with iPhone or Android phones and tablets.

- **Pangiam VeriScan** – Our industry-leading facial recognition camera takes a guest's photograph in real time and transmits them securely to the biometric matching service – for convenient, fast identity verification.

- **Pangiam Trueface** – Our facial recognition software uses photos and videos taken in real time and performs a one-to-many (1:N) or one-to-one (1-1) match against a temporary gallery of client images—delivering a safer, smoother and more efficient identity verification process. Offered as an on-premise deployment, mobile deployment or cloud-based Software as a Service (SaaS) product, Pangiam Trueface is versatile to meet a variety of needs and requirements.

About Pangiam Government Solutions

Pangiam Government Solutions is dedicated to serving the global public sector market. Pangiam Government Solutions offers both off-the-shelf products through federally approved procurement channels, as well as the ability to collaborate with customers to reimagine their identity verification processes and experiences. In those cases, Pangiam Government Solutions can design, implement and operate all aspects of a proposed solution, serving as a managed service provider and leveraging the capabilities of our extensive suite of products.
